

Life Sciences IT Checklist

Simple fixes that prevent everyday delays

SYSTEM PERFORMANCE

- Key applications load quickly (no freezing or long wait times)
- Workstations aren't more than 4-5 years old
- Lab devices are running supported operating systems
- Network/Wi-Fi is stable across your office and lab spaces

ACCESS & USER SUPPORT

- Team members can access the tools they need without workarounds
- No shared passwords or unsecured login practices
- Remote users can connect reliably to internal systems
- Permissions are up to date (no unnecessary access for former staff)

DEVICE HEALTH

- All laptops and workstations have current patches
- Antivirus/endpoint protection is installed and running
- No unmanaged or unknown devices connected to your network
- Backups run successfully and restore tests pass

EVERYDAY USABILITY

- Teams aren't losing time troubleshooting basic IT issues
- Tickets get resolved quickly with minimal disruption
- Tools integrate smoothly (no broken connections or manual re-entry)
- No recurring issues that staff "just work around"

Want Help Reviewing Your IT?

We've spent 16+ years helping Life Sciences and Med Device teams eliminate everyday IT bottlenecks so scientists and staff can work without disruptions.
